

OVERVIEW

Postal geography is the most common method of analysing and mapping corporate information for business users due to the almost universal knowledge of the Postcode by consumers and businesses alike.

Many businesses hold postcoded address databases of their customers. The use of digital Postcode geography, allows the relationship between the customer and their geographic location to be established.

Postcode information may be mapped to analyse various relationships including the distribution of customers or sales by product line or period. Postcode information may also be mapped against one of the many geodemographic or business datasets to provide broader market analysis.

APPLICATIONS

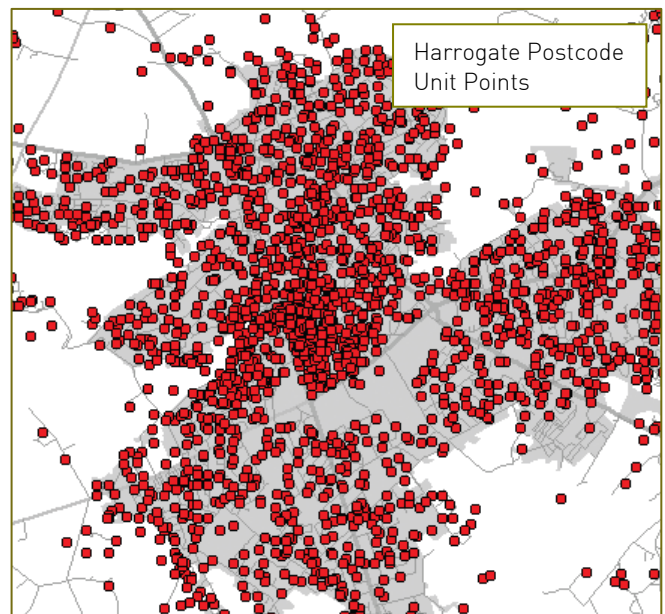

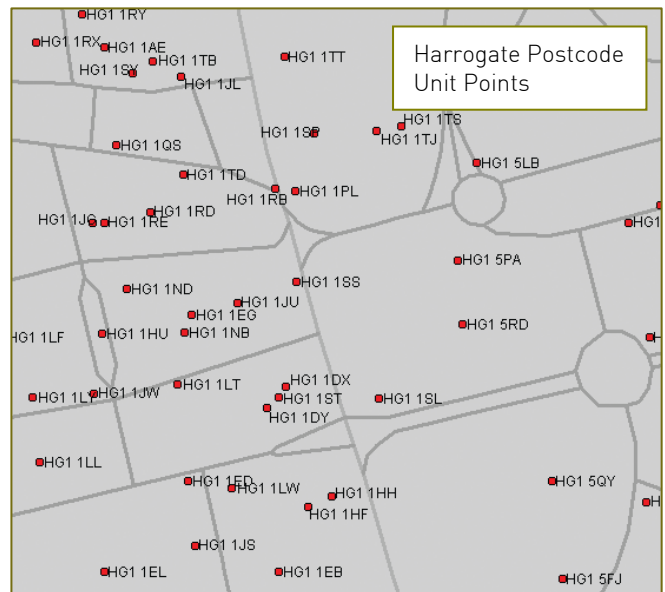

- Analysis of customer distribution
- Proximity analysis
- Locating retail outlets
- Accurate map navigation
- Displaying and analysis of geodemographic classification systems at Full Postcode level

KEY FEATURES/ BENEFITS

- Incorporates the latest Postcode changes across the Geoplan range
- Provides the geographic position of each of the 1.7 million (approximately) Postcodes (e.g. HG1 5AW)
- Easily match to internal data sets
- An accuracy of, on average, 1 metre for most of the Postcodes

PRODUCT CONTENT

- Latest Postcode Geography (updates every six months)
- UK coverage: Includes England, Wales, Scotland and Northern Ireland. Also includes the Channel Islands and the Isle of Man, providing extensive Postcode coverage.
- Geoplan has undertaken extensive cleansing and validation processes to ensure that each of the 1.7 million (approximately) Postcodes now has a non-zero, accurate and unique grid reference resulting in one of the most popular full Postcode point files available in the UK.
- Attributes include Delivery counts for residential, non residential and large user Postcodes, Posttown, NHS, Ward Code and Positional Quality Indicator (where available).
- Data is supplied with OSGB map projection

Digital sample data NOW available covering the HG Postcode Area can be downloaded from www.geoplan.com or please ring on 01423 569538

CONT

SUPPLY OPTIONS

Data is available in all major GIS and desktop mapping systems including GeoAnalyser, MapInfo, ArcInfo and ArcView

Data can be supplied via CD or via our FTP server

EXTRA FEATURES PROVIDED
