

Save time and effort modifying the sizes of your classified symbols – make styling your map easier.

The GeoAnalyser Modify Symbol Size module has been designed specifically for users of the GeoAnalyser system who map data using Classified Symbols.

Following feedback from Geoplan customers, we have developed a module which allows you to simultaneously modify the size of a set of symbols. The Module has been designed as an add-on to the Geoplan GeoAnalyser system.

#### Key Tasks

- Simultaneously modify the size of a set of symbols.
- Works with any classified points layer.
- Adjust the appearance of the map with greater ease.
- Avoid the tedious practice of changing all symbols within the sequence.

#### Key Features

- Improve the appearance of your Classified Symbols at different map heights.
- Modify the size of all symbols in a Style Sequence simultaneously.

#### Key Benefits

- Save time modifying the size of your points.
- Improve the appearance of your map quickly and easily.
- Ensure all of your symbols are a consistent size.
- Very easy to use, no training required.
- Excellent user support as part of your ESP package.

#### What our clients have said...

“Geoplan GeoAnalyser removes the guesswork and provides the decision support we need at the click of a button.”  
(Molly Maid UK Limited)

“We are very impressed indeed by the flexibility of Geoplan GeoAnalyser, its capacity to map and analyse vast amounts of data, and the development opportunities available.”  
(Yum! Restaurants International)
