

Take advantage of the Ordnance Survey OpenData Initiative and obtain high quality street level mapping, at no extra cost.

We are pleased to advise that Geoplan, in conjunction with the Ordnance Survey, are now able to provide OS StreetView for all StreetFinder clients, at no extra charge. This high resolution map base is perfect for use in planning marketing and door drop campaigns.

Visit the Ordnance Survey website to take advantage of the recent Open Data Initiative, and **instantly** download OS StreetView for StreetFinder.

Features:

- Provides clear street-level detail, including building outlines, woodland and water on a static map backdrop.
- Raster Map Base tiles in TIF format ready for easy import into Geoplan StreetFinder software.
- Familiar, Ordnance Survey map styling with enhanced features such as label bending.
- All of the above available at no extra cost.

Benefits:

- Improved printed maps.
- Free to copy and distribute, with no copyright restrictions.
- Enhanced map and reporting output for use at point of sale, in planning and in the field.
- Fast, flexible and easy to download directly from the OS website:

What our clients have said.....

"StreetFinder has been integral to our success and growth, and has enabled us to develop our positioning as a high quality leaflet distribution business with complete confidence."
(CK Leafleting)

"I've always held your company in high esteem and whether it's support, training or customer management you continue to reinforce my view."
(Guardian News and Media)

"No request ever seems too much trouble and is dealt with professionally and with great enthusiasm!"
(Yum! Restaurants International)

Next Steps:
