

Improve the appearance of your travel time or catchment boundaries in a matter of seconds.

The GeoAnalyser Smooth Boundaries module enables you to improve the appearance of your catchment areas or boundaries.

The module has been designed as an add-on to the Geoplan GeoAnalyser. The module allows boundaries to be curved to provide a more aesthetically pleasing catchment area on a map.

Key Tasks

- Smooth one or many boundaries of your catchment areas to make the boundary line more subtle.
- Smooth travel time or hand-drawn catchments.
- Adjust the appearance and quality of the map with ease.

Key Features

- Improve the appearance of catchment areas.
- Ensure boundary features are more subtle and aesthetically pleasing.
- Works with any boundary layer in GeoAnalyser file [T2K].

Key Benefits

- Improve the quality of the map output for use:
 - At point of sale.
 - In presentations.
 - In planning.
 - In the field.
- Increase your return on investment.
- Very easy to use, no training required.
- Excellent user support as part of your ESP package.

What our clients have said...

“Geoplan GeoAnalyser removes the guesswork and provides the decision support we need at the click of a button.”
(Molly Maid UK Limited)

“We are very impressed indeed by the flexibility of Geoplan GeoAnalyser, its capacity to map and analyse vast amounts of data, and the development opportunities available.”
(Yum! Restaurants International)
