

Plan, re-schedule and navigate to appointments 'on-the-go' with the Tom-Tom Visit Manager.

The Tom-Tom Visit Manager is an application that allows you to manage your visit schedule on-the-go, using your standard Tom-Tom satellite navigation device.

Designed for users of GeoAnalyser or TourSolver, the system contains a number of features which enable you to plan and re-schedule visits, taking into account real-time events. The Tom-Tom Visit Manager makes use of the standard navigational features of your Tom-Tom device. These tools can provide you with the information you need to effectively complete your visit schedule, saving time, effort and money in the process.

Key Tasks

- Use in conjunction with GeoAnalyser and TourSolver.
- Prioritise appointments in real time.
- Calculate or re-calculate routes based on unanticipated changes to the schedule.
- Log details of the time and duration of the appointments you make.
- Export visit log to GeoAnalyser to analyse and compare your route with the original schedule.

Key Features

- Import list of visits from GeoAnalyser or TourSolver.
- View list of appointments on Tom-Tom device.
- Prioritise the visit order by sorting appointments by values such as sales revenue.
- Sort appointments by visit order generated by TourSolver to follow the 'optimum' route.
- Select and locate visit locations using the Tom-Tom Navigator map browser.
- View imported sites by proximity to current location in order to identify potential next destinations.
- Enter visit timings for analysis in GeoAnalyser in the future.

- Select next visit based on appropriate criteria such as distance, value, score or office-based instruction to re-direct effort.
- Utilise all of the navigational functions within the standard Tom-Tom device.
- Add, remove or edit appointments on the Tom-Tom device.
- Set alarms to warn of potential lateness for upcoming appointments.
- Adjust meeting times to react to real-time situations.
- Set a "Breaks, Delays and Diversions" allowance to provide a contingency time for unexpected events.

Key Benefits

- Quick and easy to use.
- Empower your field force to plan and re-calculate their own optimal routes.
- Make real time adjustments to your call schedule to allow for unanticipated problems or events.
- Maintain control over ad-hoc un-scheduled visits that need to be planned at short notice.
- Save time selecting the next most appropriate visit.
- Save travel costs and wasted resource by selecting the most appropriate locations to visit next.
